Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

## Application No. Applicant(s) 10/549,465 ZHANG ET AL. Office Action Summary Examiner Art Unit SYED ZIA 2431 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 14 September 2005. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-27 is/are pending in the application. 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration. 5) Claim(s) \_\_\_\_\_ is/are allowed. 6) Claim(s) 1-27 is/are rejected. 7) Claim(s) \_\_\_\_\_ is/are objected to. 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some \* c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \* See the attached detailed Office action for a list of the certified copies not received. Art Unit: 2431

## DETAILED ACTION

This office action is in response to application filed on September 14, 2005. Claims 1-27 are pending.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(e) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Jonker et al. (U.S. Patent 7,483,984).

Regarding Claim 1 Jonker teach and describe a method for controlling access by a user
terminal to a communications network comprising the steps of: receiving from the user terminal
a request to access the communications network; transmitting to the user terminal an identity
request message; receiving from the user terminal, if the user terminal utilizes a predetermined
authentication protocol, a response to the identity request message; determining whether the user

Art Unit: 2431

terminal uses the predetermined authentication protocol in response to the response to the identity request message; selecting an authentication mechanism compatible with the user terminal upon determining the user terminal is not compatible with the predetermined authentication protocol, for allowing user terminal access to the communications (col. 5 line 54 to col.6 line 8, col.9 line 10 to line 35, and col. 11 line 1 to col.12 line 7).

- 2. Regarding Claim 4 Jonker teach and describe method for controlling mobile terminal access to a wireless local area network, comprising the steps of: receiving from the mobile terminal a request to access the wireless local area network; transmitting to the mobile terminal an identity request message; receiving from the mobile terminal, if the mobile terminal utilizes an IEEE 802.1x protocol, a response to the identity request message; determining whether the mobile terminal is IEEE 802.1x compliant in response to the response to the identity request message; and selecting an authentication mechanism, compatible with the mobile terminal in response to the determination, for allowing user mobile terminal access to the wireless local area network (col. 5 line 54 to col.6 line 8, col.9 line 10 to line 35, and col. 11 line 1 to col.12 line 7).
- 3. Regarding Claim 10 Jonker teach and describe an access point in communication with a terminal device in a wireless local area network, comprising: a means to determine whether the terminal device utilizes an IEEE 802.1x protocol and, if the terminal does not utilize said protocol, then the access point employing an authentication means compatible with the terminal

Art Unit: 2431

device otherwise the access point employing an IEEE 802.1x protocol (col. 5 line 54 to col.6 line 8, col.9 line 10 to line 35, and col. 11 line 1 to col.12 line 7).

- 4. Regarding Claim 14 Jonker teach and describe a method for controlling access by a terminal device in a wireless local area network by determining whether the terminal device utilizes an IEEE 802.1x protocol comprising the steps of: an access point communicating to the mobile terminal a request to identify, and if the terminal device utilizes an IEEE 802.1x protocol, acknowledging the request to identify, otherwise the access point determining that the terminal is not IEEE 802.1x compliant and selecting an authentication mechanism compatible with the mobile terminal (col. 5 line 54 to col.6 line 8, col.9 line 10 to line 35, and col. 11 line 1 to col.12 line 7).
- 5. Regarding Claim 21 Jonker teach and describe a method for controlling access of a terminal device in a wireless local area network by determining whether the terminal device utilizes an IEEE 802.1x protocol comprising the steps of: communicating through the an access point to the mobile terminal a request to identify, and if the terminal device utilizes an IEEE 802.1x protocol, acknowledging the request to identify, otherwise determining by the access point that the terminal is not IEEE 802.1x compliant and selecting an authentication mechanism compatible with the terminal (col. 5 line 54 to col.6 line 8, col.9 line 10 to line 35, and col. 11 line 1 to col.12 line 7).

Application/Control Number: 10/549,465 Art Unit: 2431

Claims 2-3, 5-9, 11-13, 15-20, , and 22-27 are rejected applied as above rejecting Claims
 1, 4, 10, 14, and 21. Furthermore, Jonker teach and describe a, wherein:

As per Claim 2, the user terminal comprises a mobile terminal and the communications network comprises a wireless local area network wireless local area network that complies with the IEEE 802.11 standards (col. 5 line 54 to col.6 line 8).

As per Claim 3, the selecting step includes selecting an appropriate authentication server coupled to the wireless local area network in response to the determination (.col.4 line 1 to col. 5 line 17).

As per Claim 5, further comprising the steps of, if the mobile terminal is IEEE 802.1x compliant, transmitting an authentication request to an authentication server and receiving an authentication response utilizing the IEEE 802.1x protocol, and controlling mobile terminal access to the wireless local area network in response to the authentication response (col.4 line 1 to col.5 line 17, and col. 5 line 54 to col.6 line 8).

As per Claim 6, further comprising the steps of, if the mobile terminal is not IEEE 802.1x compliant, redirecting an authentication request to an HTTP server for utilizing a browser based authentication (col.4 line 1 to col.5line 17, and col.16 line 35 to col.18 line 40).

As per Claim 7, further comprising the step of configuring a packet filtering module to redirect the authentication request to the HTTP server (col.16 line 35 to col.18 line 40)..

As per Claim 8, further comprising the step of maintaining state information in the wireless local area network for use by the packet filtering module and the HTTP server (col.16 line 35 to col.18 line 40).

Application/Control Number: 10/549,465

Art Unit: 2431

As per Claim 9, the state information includes one of a first state indicative of ongoing authentication process, a second state indicative of authentication failure, a third state indicative of authentication success, and a fourth state indicative of a non IEEE 802.1x mobile terminal (col.4 line 1 to col.5 line 17, and col. 5 line 54 to col.6 line 8)

As per Claim 11, wherein the means to determine includes communicating to the terminal device a Request-Identity extensible authentication protocol packet and if the mobile terminal utilizes the IEEE 802.1x protocol the access receives a Response-Identity extensible authentication protocol packet (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8)

As per Claim 12, further comprises the means to configure an internet protocol packet filtering to redirect the device HTTP request to a local server if the terminal device does not utilize said protocol (col.16 line 35 to col.18 line 40).

As per Claim 13, The access point in claim 10, further comprises means to communicate IEEE 802.1x protocol exchanges and means to establish internet protocol packet filtering through an internet protocol filter module and state information for the HTTP server to control the terminal device access during and after IEEE 802.1x based authentication process if the access point detects that the terminal device is an IEEE 802.1x client (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8, and col.16 line 35 to col.18 line 40).

As per Claim 15, wherein the access point determines that the terminal is not IEEE 802.1x compliant when it does not receive an extensible authentication protocol identity response packet after a timeout value (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8).

Application/Control Number: 10/549,465 Art Unit: 2431

As per Claim 165, further comprising the step of access point detecting that if the terminal device is not IEEE 802.1x compliant, then configuring an internet protocol packet filter and redirecting a user HTTP request to a local server (col.4 line 1 to col.5line 17, and col.16 line 35 to col.18 line 40)..

As per Claim 17, further comprising the step of the local server communicating to the terminal device information specifically related to a browser based authentication (col.16 line 35 to col.18 line 40).

As per Claim 18, further comprising the step of the access point transitioning to a state if the terminal device utilizes the IEEE 802.1x protocol that indicates that the terminal device is IEEE 802.1x compliant and thereafter processing all communication utilizing the IEEE 802.1x protocol (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8).

As per Claim 19, further comprising the step of the access point transitioning to a state corresponding to browser based authentication if the authentication process fails (col.16 line 35 to col.18 line 40).

As per Claim 20, further comprising the step of the access point transitioning to a state corresponding to browser based authentication if the terminal device is not IEEE 802.1x compliant (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8).

As per Claim 22, further comprising the step of deter-mining in the access point that terminal is not IEEE 802.1x compliant if it does not receive an extensible authentication protocol identity response packet after a preset time (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8).

Application/Control Number: 10/549,465 Art Unit: 2431

As per Claim 23, further comprising the step of detecting in the access point that if the terminal device is not IEEE 802.1x compliant, then configuring an internet protocol packet filter and redirecting a user HTTP request to a local server (col.4 line 1 to col.5line 17, and col.16 line 35 to col.18 line 40).

As per Claim 24, further comprising the step of communicating from the local server to the terminal device, information specifically related to a browser based authentication (col.16 line 35 to col.18 line 40).

As per Claim 25, further comprising the step of transitioning to a state in the access point if the terminal device utilizes the IEEE 802.1x protocol that indicates that the terminal device is IEEE 802.1x compliant and thereafter processing all communication utilizing the IEEE 802.1x protocol (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8).

As per Claim 26, further comprising the step of transitioning to a state in the access point corresponding to browser based authentication if the authentication process fails (col.16 line 35 to col.18 line 40).

As per Claim 27, further comprising the step of transitioning to a state in the access point corresponding to browser based authentication if the terminal device is not IEEE 802.1x compliant (col.4 line 1 to col. 5 line 17, and col. 5 line 54 to col.6 line 8)
